

Career-Oriented Curricula Development for Road Vehicle Maintenance

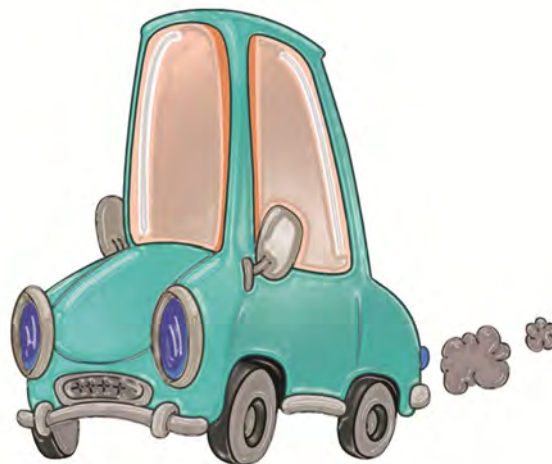

CODE

Volume I - 26 October 2014

PARTNERSHIP FOR CAREER-ORIENTED EDUCATION

*Yes!!! ... I learned
how to fix it well.*

Project Focus

Establishing an academic-enterprise-official partnership for vehicle engineering and maintenance education. It will transfer to local partners skills and know-how relevant to identify local job needs; curricula development for modern vehicle technologies.

Career-Oriented Curricula Develop

Launching Joint Students Projects

Within the framework of CODE project, two joint students' graduation projects were launched. They will last for one academic year, and they will address target sector specific needs. The involved teams and the consortium will share the results, which will be used in future activities and other projects.

Project Monitoring Visit – Hebron

On 18th of September 2014, Palestine Polytechnic University, the grant-holder of Tempus project CODE, hosted the National Erasmus+ Of-

ice project monitoring visit in Hebron. The office director, Dr. Nidal JAYYOUSI, and his secretary, Mrs. Aya FUQHA, was the visiting team. The event was attended by representatives of local partners; CODE coordinator, Dr. Momen SUGHAYYER, the administrative assistant, Eng. Aref HERBAWI, and the financial assistant, Mr. Naseem SULTAN, from PPU; Dr. Samer MAYALEH the Dean of HHCOT, Dr. Basim ALSAYID from PTUK, Dr. Abdullah BANAT from MOHE, and Dr. Ishaq SIDER from EAJC.

First Workshop – Hebron

CODE project first workshop was held in Hebron at Palestine Polytechnic University over the two days June 16th and 17th of 2014. The workshop first session was opened by project coordinators, who welcomed all the participants and wished them successful work and pleasant stay in Hebron during these difficult days that Palestine lives. He briefly outlined the meeting agenda and goals, and he explained that some participations will be organized via Skype given some partners' representatives

were unable to attend due to the current political situation in Palestine. Then, he spoke about the project progress and highlighted some aspects of the dissemination activities conducted since its launching.

ment for Road Vehicle Maintenance

GNFA Field Assessment Visit

Assessment of workforce skills needed for road vehicles maintenance sector in Palestine was subject of two experts field visit

over the period of June 1-5, 2014. MedLink Association, partner number nine, subcontracted GNFA (Groupement National Formation Automobile) for the project consortium and partially financed the mission from its own sources to conduct this study. The contribution of MedLink reflects its special commitment towards the project. GNFA has developed experience relevant to vehicles maintenance over the last four decades.

Coordinators Workshop – Brussels

The Education, Audio-visual and Culture Executive Agency of the European Commission

organized two-day international conference in the framework of the EU Tempus programme. The conference attendees were the representatives of Tempus Joint Projects and Structural Measures selected under the Tempus IV sixth Call for proposals. The conference took place from 10 to 11 February 2014 at the Crowne Plaza Hotel-Le Palace, Brussels, Belgium.

Kick-Off Meeting – Hebron

Over the two days 19-20 of January, 2014, the kick-off meeting was held at the Palestine Polytechnic University (PPU) in Hebron city of Palestine. The meeting was opened by project coordinator, who welcomed all the participants and wished them successful work and pleasant stay at

Palestine Polytechnic University and in Hebron. He introduced the present representatives of the project partners and the meeting guests. He presented the meeting agenda and goals, and he spoke about his personal motivation behind preparing this Tempus project, which is creating a completely new model for education curricula oriented to specific career that is ground vehicle maintenance.

CODE Consortium

Palestine Polytechnic University

Università degli Studi dell'Aquila

Conservatoire National des Arts et Métiers

University "Dunarea de Jos" of Galati

Birzeit University

Hisham Hijjawi College of Technology

Palestine Technical University - Kadoorie

Ministry of Labour

MedLink Association.

Ministry of Higher Education

Engineers Association - Jerusalem Center

University College of Applied Sciences

Lunching Training and Curricula Evaluation Activities

MedLink representative together with the project coordinator are working with the consortium partners to prepare the training plan. The training will address academic and technical competences of the Palestinian staff.

Five teams from the Palestinian academic institutions partners have prepared reports on the currently offered programs relevant to project target curricula.
